1942

Price Two Shillings and Sixpence net

PRINTED IN GREAT BRITAIN

The *Biochemical Journal* is conducted by the Biochemical Society and is published by the Cambridge University Press.

This Society has been instituted solely for the advancement of the Science of Biochemistry. Persons interested in Biochemistry are eligible for election.

Meetings are held at different centres for the communication of papers to the Society.

Members are entitled to receive a copy of the Journal. Further information as to the conditions of membership may be obtained on application to the Hon. Secs., Dr W. T. J. Morgan, Lister Institute, Chelsea Bridge Road, London, S.W.1, or Dr W. Robson, Dept. of Physiology, King's College, Strand, London, W.C. 2., or to the Hon. Treas., Mr J. Addyman Gardner, 35 Bullingham Mansions, Church Street, London, W. 8, to whom subscriptions should be sent.

Papers for publication should be sent to Professor F. G. Young, St Thomas's Hospital Medical School, The Manor House, Godalming, Surrey. Communications respecting the printing of the articles, or respecting the purchase of offprints should be addressed to the University Press, Cambridge.

The Journal is issued in monthly numbers and the date at which each paper is received is printed at the beginning of the paper.

All communications respecting the purchase of copies of the parts or volumes, whether current or back issues, or respecting subscriptions in the case of non-members of the Biochemical Society (£3. 10*s*. 0*d*. net per volume (post free) payable in advance) should be addressed to The Cambridge University Press, Bentley House, 200 Euston Road, London, N.W.1, or to the Hon. Treas., Mr J. Addyman Gardner, 35 Bullingham Mansions, Church Street, London, W. 8. For prices of back numbers and volumes see list on p. 4 of Wrapper.

Quotations can be given for Buckram binding cases and for binding Subscribers' Sets.

The Cambridge University Press has appointed the University of Chicago Press agent for the sale of the *Biochemical Journal* in the United States of America.

Notice to Contributors

1. Contributors who are members of the Biochemical Society receive 25 copies (without covers) of their papers free and can purchase additional copies if notice be given when their proofs are returned. Other contributors may purchase reprints but receive no free copies.

2. Papers submitted for publication are understood not to be offered to any other Journal for prior or simultaneous publication.

3. All communications intended for publication must be type-written.

4. Contributors residing outside Europe are requested to nominate someone resident in Great Britain to be responsible for the correction of the proofs of their papers. Papers from such contributors should be accompanied by a statement of the number of reprints required.

5. **References.** References to literature should be arranged alphabetically according to authors' names at the end of the communication, each accompanied by the date, title of Journal, volume and page, thus: Ackermann, D. (1912). *Z. Biol.* **59**, 17. Titles of Journals should be abbreviated in accordance with the "World List of Scientific Periodicals". In the text the reference should be indicated by the author's name and the date, enclosed in brackets, thus [Ackermann, 1912]. If reference is made to several papers published by one author in a single year, these should be numbered in sequence and the number quoted along with the year both in the text and in the collected references.

6. Chemical formulae should be written, as far as possible, in a single horizontal line.

7. Illustrations and curves accompanying the papers must be carefully drawn, about twice the size of the finished block, on smooth white Bristol boards or ordinary curve paper in Indian ink. Any lettering on these drawings should be lightly inserted in pencil. Legends should be typed on slips of paper attached to the drawings.

INDEX OF AUTHORS

Entries marked with an asterisk (*) are those for which only a title is given and of which there are no summaries

ABRAHAM, E. P. Chemotherapeutic agents, mode of action of, discussion on 5

ABRAMOWITZ, R. K. *see* LOOFBOUROW, J. R.

ADLER, E. *see* KAPELLER-ADLER, R.

*ANDERSON, A. B. Lead content of urinary and biliary calculi ii (Nos. 3 & 4)

BACH, S. J. and WILLIAMSON, S. Synthesis of urea in mammalian liver without participation of arginase xvi

BACHARACH, A. L., COATES, M. E. and MIDDLETON, T. R. A biological test for vitamin P activity 407

BACHARACH, A. L. and ROBINSON, F. A. Prolegomena to a discussion on chromatography xvii

BAILEY, K. Myosin and adenosinetriphosphatase 121

BAILEY, K. The denaturation of edestin by acid: T. B. Osborne's edestan 140

BAKER, W., DAVIS, J. G., LEEDS, W. G., OXLEY, P., SHORT, F. W., TWIGG, R. S. and WATSON, D. W. Synthesis and standardization of sodium resazurate for testing the hygienic quality of milk i (Nos. 1 & 2)

BALDWIN, E. and KING, H. K. Glycogen. 8. The glycogen of *Ascaris lumbricoides* from the pig 37

BANERJI, G. G. and YUDKIN, J. The vitamin B_1 sparing action of fat and protein. 3. The oxidation of pyruvate by the tissues of symptom-free rats on diets deficient in vitamin B_1 530

BARANGER, P. M. and MERCIER, J. M. Note on a colour reaction between ergosterol and methyldichlor-arsine 703

BARNETT, J. W. and ROBINSON, F. A. Analogues of pantothenic acid. 1. Attempted preparation of growth promoters 357

BARNETT, J. W. and ROBINSON, F. A. Analogues of pantothenic acid. 2. Preparation of growth inhibitors 364

BELL, G. H. and CUTHBERTSON, D. P. Effect of various hormones on the properties of bone iv (Nos. 3 & 4)

BELL, G. H. and GUTHMANN, E. A simple photoelectric haemoglobinometer iii (Nos. 3 & 4)

BELL, G. H., LAZARUS, S., MUNRO, H. N. and SCARBOROUGH, H. Vitamin P: Observations on the correlation between positive and negative methods of determining the capillary resistance in man iii (Nos. 3 & 4)

*BELL, G. H. *see also* LAZARUS, S.

BENDALL, J. R. and LEHMANN, H. Influence of light and hormones on the glycogen synthesis in rat liver slices xiv

INDEX OF SUBJECTS

Entries marked with an asterisk (*) are those for which only a title is given and of which there are no summaries

Absorption spectra, comparison of, by the spectrocomparator (Ellinger) 283
Absorption of zinc (McCance & Widdowson) 692
Acetobacter species, 'catalase test', with special reference to (Walker & Tošić) vii
Acetobacter species as common contaminants of brewery yeast (Walker & Tošić) vii
Acetone-butyl alcohol fermentation, studies in (Davies) 582
Acetylmethylcarbinol, origin and relationship to 2:3-butylene glycol in bacterial fermentations (Stahly & Werkman) 575
Acids, component, of some wild animal and bird fats (Hilditch, Sime & Maddison) 98
Acylation of amino-acids by 3:5-dinitrobenzoyl chloride (Saunders, Stacey & Wilding) 368
Adenine nucleotides and known growth factors, influence of, on proliferation-promoting effect of damaged-cell products (Loofbourow) 737
Adenosine deaminase (Brady) 478
Adenosine- and inosine-nucleotides in the phosphorus metabolism of muscle (Kleinzeller) 729
Adenosine- and inosine-nucleotides in the phosphorus metabolism of muscle (Kleinzeller) xiv
Adenosinetriphosphatase, activity of, in myosin preparations (Needham) 113
Adenosinetriphosphatase and myosin (Bailey) 121
Adipose tissue *in vitro*, metabolism of (Mirski) 232
Adsorbents, ion exchange, in the analysis of biological material (Platt & Glock) xviii
Aeration, relation of activity of proliferation-promoting factors from injured cells to (Loofbourow, Webb, Loofbourow & Abramowitz) 513
Aliphatic bases, long-chain, antibacterial action and chemical constitution of (Fuller) 548
Amines, oxidation of, by bacteria (Gale) 64
d-Amino-acid oxidase conjugated protein, effect of X-rays on (Dale) 80
Amino-acids, acylation of, by 3:5-dinitrobenzoyl chloride (Saunders, Stacey & Wilding) 368
Amino-acids, effect of, on phosphate transfer in muscle extract (Lehmann & Pollak) 672
Amino-acids, enzymic oxidation of sulphur-containing (Medes & Floyd) 259
Amino-acids, the metabolism of, by *Cl. welchii* (Woods & Trim) 501
Amino-acid residues in gelatin, arrangement of (Gordon, Martin & Synge) i (Nos. 3 & 4)
p-Aminobenzoate of plasma in relation to the action of sulphanilamide (McIlwain) vi
Ammonia, determination of, by microdiffusion methods using buffered absorbents (Conway & O'Malley) 655
Anaerobes, studies in the metabolism of. 8. The metabolism of amino-acids by *Cl. welchii* (Woods & Trim) 501
Analogues of pantothenic acid, bacterial inhibition by metabolic (McIlwain) 417
*Anaphylactic sensitization of guinea-pigs to proteins (Winter) v
Animals, wild, component acids of fats of (Hilditch, Sime & Maddison) 98
Anterior pituitary extract, nitrogen retention and the diabetogenic action of (Young) ii (Nos. 1 & 2)
Antibacterial action and chemical constitution in long-chain aliphatic bases (Fuller) 548
Antibacterial substances, surface behaviour of (Bradbury & Jordan) 287
Antimonials, organic. Polarographic studies on excretion of (Goodwin & Page) xi
Antirachitic effect of fat on rats receiving high calcium-low phosphorus rachitogenic diets (Booth, Henry & Kon) 445
Arginase; synthesis of urea in mammalian liver without participation of (Bach & Williamson) xvi
Arginine, colorimetric estimation of (Macpherson) 59
Ascaris lumbricoides from the pig, glycogen of (Baldwin & King) 37
Ascorbic acid, catalytic oxidation of, in presence of tea infusions (Snow & Zilva) 641
Ascorbic acid in fruits and vegetables, determination of, in the presence of SO_2 (Mapson) 196
Ascorbic acid, oxidation of, in the presence of copper (Mystkowski) 494
Ascorbic acid, a potentiometric method for determining (Harris, Mapson & Wang) 183
Ascorbic acid in whole blood, clinical estimation of (Deeney, Murdock & Rogan) 271
Atheromatous aorta, acetone-soluble lipid of (McArthur) 559

Bacteria, oxidation of amines by (Gale) 64
Bacterial growth inhibitors, chemical reactions between and constituents of bacteriological media (Oxford) 438
Bacterial inhibition by metabolite analogues. 4. Analogues of pantothenic acid (McIlwain) 417
Bacterial oxidation and vitamin B_1 (Quastel & Webley) 8
Bact. coli, inhibition of indole production by glucose in cultures of (Evans, Handley & Happold) 311
Bact. coli commune, indole formation in (Krebs, Hafez & Eggleston) 306
Bact. typhosum Ty_2, specific polysaccharide from (Freeman) 340
*3:4-Benzpyrene, metabolism of, in the rabbit (Berenblum, Holiday & Schoental) xvi
3:4-Benzpyrene, quantitative estimation of (Berenblum & Schoental) 86
3:4-Benzpyrene, rate of disappearance of, after injection (Berenblum & Schoental) 92
Biochemistry of micro-organisms (Birkinshaw, Chambers & Raistrick) 242
Biochemistry of micro-organisms (Birkinshaw, Raistrick & Smith) 829
Biological test for vitamin P activity (Bacharach, Coates & Middleton) 407
Birds, wild, component acids of fats of (Hilditch, Sime & Maddison) 98
Biuret and Greenberg methods of protein estimation (Wokes & Still) 797
Blood and bone chemistry, effect on, of prolonged administration of large doses of parathyroid hormone to puppies on varying calcium intakes (Burns & Henderson) iii (Nos. 3 & 4)
Blood creatinine, estimation of (Delory & Jacklin) 281
Blood esterases (Richter & Croft) 746
Blood, whole, clinical estimation of ascorbic acid in (Deeney, Murdock & Rogan) 271
Bone and blood chemistry, effect on, of prolonged administration of large doses of parathyroid hormone to puppies on varying calcium intakes (Burns & Henderson) iii (Nos. 3 & 4)

Bone, properties of, effect of various hormones on (Bell & Cuthbertson) iv (Nos. 3 & 4)
Brain, pigeon, method for the estimation of α-keto-acids, and its application to α-keto-acid metabolism in (Long) 807
Butter fat (English), vitamin D content of, throughout the year (Henry & Kon) 456
2:3-Butylene glycol in bacterial fermentations, origin and relationship to acetylmethyl-carbinol (Stahly & Werkman) 575

C. diphtheriae (intermediate type), nutrition of (Chattaway, Happold, Lythgoe, Sandford & Todd) v
C. diphtheriae gravis (Dundee), nutrition of (Chattaway, Happold, Lythgoe, Sandford & Todd) vi
Calcium, effect of protein intake on absorption of (McCance, Widdowson & Lehmann) 686
*Calculi, urinary and biliary, lead content of (Anderson) ii (Nos. 3 & 4)
Calves, living, production of rennet from (Berridge, Davis, Kon, Kon & Spratling) iii (Nos. 1 & 2)
*Capillary fragility, further observations on (Lazarus, Munro & Bell) ii (Nos. 3 & 4)
Capillary resistance in man. Vitamin P. Observations on correlation between positive and negative methods of determining (Bell, Lazarus, Munro & Scarborough) iii (Nos. 3 & 4)
Carotenoids of human and cow's milk, application of chromatography to the study of (Thompson, Kon & Mawson) xvii
Carotenoids, isolation of lipoid pigments from West African plantation oil; isomerization of (Hunter, Scott & Edisbury) 697
'Catalase test' with special reference to *Acetobacter* species, the (Walker & Tošić) vii
Cattle livers, vitamin A contents of (Moore & Payne) 34
Chemical constitution and antibacterial action in long-chain aliphatic bases (Fuller) 548
Chemotherapeutic agents, mode of action of, discussion on 1
Chromatogram, partition, of Martin and Synge, comments on (Lester Smith) xxii
Chromatographic adsorption analysis, consecutive eluates in, establishment of the identity or non-identity of (Ellinger) xxii
*Chromatography, achievements of, in biochemistry (Todd) xvii
Chromatography, application of, to the separation of urinary steroids (Callow) xix
Chromatography, application of, to study of the carotenoids of human and cow's milk (Thompson, Kon & Mawson) xvii
Chromatography by fractional elution, principles of, and its application to micro-analysis (Weil-Malherbe) xx
Chromatography, partition, in protein chemistry: amino-acid composition of gramicidin (Gordon, Martin & Synge) xxi
Chromatography, prolegomena to a discussion on (Bacharach & Robinson) xvii
Chromatography, routine, of fluorescent pigments in urine (Coulson, Ellinger, Glock & Platt) xix
Chromatography, theory of, and recent advances in technique (Martin) xx
Cinchophen and salicylate, effect of, on enzymes and metabolic processes (Lutwak-Mann) 706
Citric acid cycle, modified (Krebs) ix
Cl. acetobutylicum, intermediates in fermentation of glucose by (Davies) 582
Cl. acetobutylicum (BY), potassium as an essential factor in fermentation of maize meal by (Davies) 582
Cl. butylicum, formation of viscous materials by (Lythgoe & Madinaveitia) ix
Cl. oedematiens toxins, lecithinase activity of (Macfarlane) iii (Nos. 1 & 2)
Cl. welchii, effect of *p*H and glucose during growth of, on production of α and θ toxins and hyaluronidase (Gale & van Heyningen) 624
Cl. welchii, the metabolism of amino-acids by (Woods & Trim) 501
Cl. welchii toxin, specificity of the lecithinase present in (Macfarlane) iii (Nos. 1 & 2)
Colorimetric estimation of arginine and histidine (Macpherson) 59
Colour reaction between ergosterol and methyl-dichlorarsine (Baranger & Mercier) 703
Copper, effect of presence of, on oxidation of ascorbic acid (Mystkowski) 494
Creatinine, blood, estimation of (Delory & Jacklin) 281
Cysteic acid, metabolism of sulphur (Medes & Floyd) 836
l(−)-Cysteic acid decarboxylase (Blaschko) 571
Cystine disulphide linkages of wool, action of sulphites on (Middlebrook & Phillips) 428
Cystine disulphide linkages in wool, action of formaldehyde on (Middlebrook & Phillips) 294
Cystitis organism, biochemistry of. 1 and 2 (King) 43

Damaged-cell products, proliferation-promoting effect of, attributable to adenine nucleotides and known growth factors (Loofbourow) 737
Deaminase, adenosine (Brady) 478
Decarboxylase of *l*(−)-cysteic acid (Blaschko) 571
Diabetogenic action of anterior pituitary extract and nitrogen retention (Young) ii (Nos. 1 & 2)
2:6-Dichlorophenolindophenol, estimation of vitamin C by titration against (Harris & Olliver) 155
Diet fat, effect of variations of, on dietary fatty livers in rats (Channon, Hanson & Loizides) 214
Digestibility of mixed food (Kestner) ii (Nos. 1 & 2)
Digestibility of wheat straw and wheat-straw pulp, the (Ferguson) 786
Digestion of straw by the ruminant (McAnally) 392
3:5-Dinitrobenzoic acid and 3:5-dinitrobenzoyl chloride, preparation of (Saunders, Stacey & Wilding) 368
Dissimilation of phosphoglyceric acid by *Escherichia coli* (Utter & Werkman) 485
Disulphide, cystine, linkages in wool, action of formaldehyde on (Middlebrook & Phillips) 294

Edestan, T. B. Osborne's (Bailey) 140
Edestin, denaturation of, by acid (Bailey) 140
Eluates, consecutive, in chromatographic adsorption analysis, establishment of the identity or non-identity of (Ellinger) xxii
Elution, fractional, principles of chromatography by, and its application to micro-analysis (Weil-Malherbe) xx
Enzymes, effect of reductants and oxidants on sugar hydrolysing (Feigenbaum) 768
Enzymic activities of bacteria (*Escherichia coli* and *Micrococcus lysodeikticus*), effect of *p*H of medium during growth, biological significance of changes produced (Gale & Epps) 600
Enzymic activities of *Escherichia coli*, influence of glucose during growth on, comparison with effect produced by fermentation acids (Epps & Gale) 619
Enzymic oxidation of sulphur-containing amino-acids (Medes & Floyd) 259
Equilibrium state in phosphorylase systems, influence of *p*H upon (Hanes & Maskell) 76
Ergosterol and methyldichlor-arsine, colour reaction between (Baranger & Mercier) 703
Escherichia coli, aspects of polysaccharide storage in (Dawson & Happold) v
Escherichia coli, dissimilation of phosphoglyceric acid by (Utter & Werkman) 485
Escherichia coli, effect of *p*H during growth on enzymic activities of. Biological significance of changes produced (Gale & Epps) 600

Escherichia coli, influence of glucose during growth on enzymic activities of, comparison with effect of fermentation acids (Epps & Gale) 619
Esterases, blood (Richter & Croft) 746
Estimation of iodine in thyroid gland material, the; an examination of Kendall's method of combustion (Doery) 519
Estimation of the sulphonamide drugs by the method of Werner, a note on the (Mawson) 845
Excreta, animal, quantitative estimation of 3:4-benzpyrene in (Berenblum & Schoental) 86
Excretion of organic antimonials, polarographic studies on (Goodwin & Page) xi
Excretion of zinc (McCance & Widdowson) 692

Fat, antirachitic effect of, on rats receiving high calcium-low phosphorus rachitogenic diets, a study of the (Booth, Henry & Kon) 445
Fat, effect of variations of, on dietary fatty livers in rats (Channon, Hanson & Loizides) 214
Fats of wild animals and birds, component acids of (Hilditch, Sime & Maddison) 98
Fatty acids of some vegetable seed phosphatides, the component (Hilditch & Zaky) 815
Fatty livers in rats, dietary, effect of variations of diet fat on (Channon, Hanson & Loizides) 214
Fermentation, acetone-butyl alcohol (Davies) 582
Fermentation acids, effect on enzymic activities of *Escherichia coli* during growth; comparison with influence of glucose (Epps & Gale) 619
Fermentation of glucose by *Cl. acetobutylicum* (Davies) 582
Fermentation of maize meal by *Cl. acetobutylicum* (BY) (Davies) 582
Fermentation, direct, of maltose by yeast (Leibowitz & Hestrin) 772
Fluorescent pigments in human urine, elimination of, comparative effect of nicotinamide and related compounds on (Coulson, Ellinger & Platt) xii
Fluorescent pigments, urinary elimination of, in animals, as a basis for the assay of nicotinamide and related compounds in foodstuffs (Ellinger, Glock & Platt) xi
Fluorescent pigments in urine, routine chromatography of (Coulson, Ellinger, Glock & Platt) xix
Fluorimetric estimation of vitamins, principles of (Wokes, Organ & Jacoby) vii
Fluorimetry of biological material, general principles of (Ellinger) xiii
Food, digestibility of mixed (Kestner) ii (Nos. 1 & 2)
Formaldehyde, action of, on the cystine disulphide linkages in wool (Middlebrook & Phillips) 294
Fruits and vegetables, determination of ascorbic acid in, in the presence of SO_2 (Mapson) 196
Fumaromono-*dl*-alanide, a metabolic product of *Penicillium resticulosum* (Birkinshaw, Raistrick & Smith) 829
Fumaryl-*dl*-alanine (fumaromono-*dl*-alanide), a metabolic product of *Penicillium resticulosum* sp. nov. (Birkinshaw, Raistrick & Smith) 829

Gelatin, arrangement of amino-acid residues in (Gordon, Martin & Synge) i (Nos. 3 & 4)
Glucose, effect of, at different *p*Hs, on production of α and θ toxins and hyaluronidase by *Cl. welchii*, during growth (Gale & van Heyningen) 624
Glucose, fermentation of, by *Cl. acetobutylicum* (Davies) 582
Glucose, influence of, during growth, on enzymic activities of *Escherichia coli*, comparison with effect produced by fermentation acids (Epps & Gale) 619
Glucose, inhibition by, of indole production in cultures of *Bact. coli* (Evans, Handley & Happold) 311
Glycogen of *Ascaris lumbricoides* from the pig (Baldwin & King) 37
Glycogen phosphorylysis and muscle action (Mirski & Wertheimer) 221
Glycogen synthesis in rat liver slices, influence of light and hormones on (Bendall & Lehmann) xiv
Gramicidin, amino-acid composition of. Partition chromatography in protein chemistry (Gordon, Martin & Synge) xxi
Greenberg and biuret methods of protein estimation (Wokes & Still) 797
Growth inhibitors, preparation of (Barnett & Robinson) 364
Growth promoters, preparation of (Barnett & Robinson) 357
Growth of tissues *in vitro*, effect of certain substances on (Davidson & Waymouth) i (Nos. 3 & 4)

Haemoglobin iron, absorption of (Black & Powell) 110
Haemoglobinometer, a simple photoelectric (Bell & Guthmann) iii (Nos. 3 & 4)
Haemopoiesis in lead poisoning (Kench, Gillam & Lane) 384
Heparin, chemistry of (Jorpes) 203
Hevea Brasiliensis, phosphatides of (Tristram) 400
Hexosediphosphate ions, effects of, on bacterial oxidation of vitamin B_1 (Quastel & Webley) 8
Histamine and histidine metabolism in normal and toxaemic pregnancy, further investigations on (Kapeller-Adler & Adler) ii (Nos. 3 & 4)
Histidine, colorimetric estimation of (Macpherson) 59
Histidine and histamine metabolism in normal and toxaemic pregnancy, further investigations on (Kapeller-Adler & Adler) ii (Nos. 3 & 4)
*Hormone tablets, subcutaneously implanted, formation of 'ghosts' in (Folley) xiv
Hormones, intercellular, production and release of proliferation-promoting factors by injured cells (Loofbourow) 631
Hormones, intercellular, proliferation promoting effect of damaged-cell products attributable to adenine nucleotides and known growth factors (Loofbourow) 737
Hormones, intercellular, relation of aeration to activity of proliferation-promoting factors from injured cells (Loofbourow, Webb, Loofbourow & Abramowitz) 513
Hormones and light, influence of, on glycogen synthesis in rat liver slices (Bendall & Lehmann) xiv
Hormones, effect of, on properties of bone (Bell & Cuthbertson) iv (Nos. 3 & 4)
Hyaluronidase, production of, during growth of *Cl. welchii*, effect of *p*H and glucose (Gale & van Heyningen) 624
7-Hydroxycholesterols as metabolites of steroids (Haslewood) 389
Hyperthyroidism, the ultrafilterable serum magnesium in (Cope & Wolff) 413

Increase in weight of rats during the dosing period of vitamin A and B_1 determinations, relation to the standard deviation of that increase (Coward) 795
Indole formation in *Bact. coli commune* (Krebs, Hafez & Eggleston) 306
Indole production, mechanisms for inhibition of, by glucose in cultures of *B. coli* (Evans, Handley & Happold) 311
Injured cells, production and release of proliferation-promoting factors by (Loofbourow) 631
Injured cells, proliferation-promoting factors from; relation of aeration to the activity of (Loofbourow, Webb, Loofbourow & Abramowitz) 513
Inosine- and adenosine-nucleotides in the phosphorus metabolism of muscle (Kleinzeller) xiv
Inosine- and adenosine-nucleotides in the phosphorus metabolism of muscle (Kleinzeller) 729
Insulin in urine, detection of (Cutting) 376
Intercellular hormones. 5. Evidence that the proliferation-promoting effect of damaged-cell products is attributable to adenine nucleotides and known growth factors (Loofbourow) 737

Intercellular hormones, mechanism of production and release of proliferation-promoting factors by injured cells (Loofbourow) 631
Intercellular hormones, proliferation-promoting, from injured cells, relation of aeration to (Loofbourow, Webb, Loofbourow & Abramowitz) 513
Iodinated amino-acids and proteins, X-ray diffraction studies in (Spiegel-Adolf, Hamilton & Henny) 825
Iodine in thyroid gland material, estimation of; an examination of Kendall's method of combustion (Doery) 519
Ion exchange adsorbents in the analysis of biological material (Platt & Glock) xviii
Iron, haemoglobin, absorption of (Black & Powell) 110
Isomerization of palm oil carotenoids (Hunter, Scott & Edisbury) 697

Kendall's method of combustion, an examination of, in relation to iodine in thyroid gland material (Doery) 519
α-Keto-acids, general method for the estimation of, and its application to α-keto-acid metabolism in pigeon brain (Long) 807
Ketone decomposition of oxaloacetic acid, effect of inorganic salts on (Krebs) 303
Kjeldahl micro-analysis, steam-distillation apparatus suitable for (Markham) 790

Lactobacillus casei E., nutrition of (Chattaway, Happold, Lythgoe, Sandford & Todd) vi
*Lead content of urinary and biliary calculi (Anderson) ii (Nos. 3 & 4)
Lead poisoning, haemopoiesis in (Kench, Gillam & Lane) 384
Lecithinase activity of *Cl. oedematiens* toxins, specificity of (Macfarlane) iii (Nos. 1 & 2)
Lecithinase in *Cl. welchii* toxin, specificity of (Macfarlane) iii (Nos. 1 & 2)
Light and hormones, influence of, on glycogen synthesis in rat liver slices (Bendall & Lehmann) xiv
Lipid, acetone-soluble, of the atheromatous aorta (McArthur) 559
Lipoid pigments from West African plantation oil; isomerization of carotenoids (Hunter, Scott & Edisbury) 697
Liver, mammalian, synthesis of urea in, without participation of arginase (Bach & Williamson) xvi
Liver, mammalian, urea formation in (Krebs) 758
Liver slices, glycogen synthesis in, influence of light and hormones on (Bendall & Lehmann) xiv
Livers in rats, dietary fatty, effect of variations of diet fat on (Channon, Hanson & Loizides) 214
Livers of sheep, cattle and pigs, vitamin A contents of (Moore & Payne) 34

Magnesium, effects of, on bacterial oxidation of vitamin B_1 (Quastel & Webley) 8
Magnesium, effect of protein intake on absorption of (McCance, Widdowson & Lehmann) 686
Magnesium, ultrafilterable serum, in hyperthyroidism (Cope & Wolff) 413
Maize meal, fermentation of, by *Cl. acetobutylicum* (BY) (Davies) 582
Maize protein in the nutrition of the pig, supplementary values of yeast protein and casein for (Macrae, El-Sadr & Sellers) 460
Maltose, direct fermentation of, by yeast (Leibowitz & Hestrin) 772
Maltose, estimation of, by takadiastase (Bunting) 639
Manometric experiments, tissue slice method in (Laser) 319
Media, bacteriological, chemical reactions between constituents of, and certain substances which inhibit bacterial growth (Oxford) 438
Metabolic product of *Penicillium stipitatum* Thom, stipitatic acid, $C_8H_6O_5$, a (Birkinshaw, Chambers & Raistrick) 242
Metabolism of adipose tissue *in vitro* (Mirski) 232
Metabolism of 3:4-benzpyrene in the rabbit (Berenblum, Holiday & Schoental) xvi
Metabolism of histidine and histamine in normal and toxaemic pregnancy, further investigations on (Kapeller-Adler & Adler) ii (Nos. 3 & 4)
Metabolism of phosphorus in muscle, adenosine- and inosine-nucleotides in (Kleinzeller) xiv
Metabolism of steroids. 3. The 7-hydroxycholesterols as metabolites (Haslewood) 389
Metabolism of strict anaerobes. 8. Metabolism of amino-acids by *Cl. welchii* (Woods & Trim) 501
Metabolism of sulphur (Medes & Floyd) 259
Metabolism of sulphur, cysteic acid (Medes & Floyd) 836
Metabolite analogues, bacterial inhibition by. 4. Analogues of pantothenic acid (McIlwain) 417
Methyldichlor-arsine and ergosterol, colour reaction between (Baranger & Mercier) 703
Methyl mercaptan, production of, by *Schizophyllum commune* Fr. (Birkinshaw, Findlay & Webb) 526
Micro-analysis, principles of chromatography by fractional elution and its application to (Weil-Malherbe) xx
Micrococcus lysodeikticus, effect of *p*H during growth on enzymic activities of; biological significance of changes produced (Gale & Epps) 600
Microdiffusion methods, determination of NH_3 and urea using buffered absorbents (Conway & O'Malley) 655
Micro-Kjeldahl analysis, steam distillation apparatus suitable for (Markham) 790
Micro-organisms, biochemistry of (Birkinshaw, Chambers & Raistrick) 242
Micro-organisms, studies in the biochemistry of. 71. Fumaryl-*dl*-alanine (fumaromono-*dl*-alanide), a metabolic product of *Penicillium resticulosum* sp.nov. (Birkinshaw, Raistrick & Smith) 829
Milk, human and cow's, application of chromatography to the study of carotenoids of (Thompson, Kon & Mawson) xvii
Milk, synthesis and standardization of sodium resazurate for testing the hygienic qualities of (Baker, Davis, Leeds, Oxley, Short, Twigg & Watson) i (Nos. 1 & 2)
Mouse, rate of disappearance of 3:4-benzpyrene from, after injection (Berenblum & Schoental) 92
Muscle action and glycogen phosphorylysis (Mirski & Wertheimer) 221
Muscle, adenosine- and inosine-nucleotides in the phosphorus metabolism of (Kleinzeller) 729
Muscle, adenosine- and inosine-nucleotides in the phosphorus metabolism of (Kleinzeller) xiv
Muscle extract, effect of amino-acids on phosphate transfer in (Lehmann & Pollak) 672
Muscle, skeletal, effect of autolysis and of freezing on the 'total nicotinic acid' content of (Platt & Glock) xv
Myosin and adenosinetriphosphatase (Bailey) 121
Myosin preparations, adenosinetriphosphatase activity of (Needham) 113

Nicotinamide and related compounds, effect on elimination of fluorescent pigments in human urine of (Coulson, Ellinger & Platt) xii
Nicotinamide and related compounds in foodstuffs, urinary elimination of fluorescent pigments in animals as a basis for assay of (Ellinger, Glock & Platt) xi
Nicotinic acid, skeletal muscle, effect of autolysis and of freezing on total content of (Platt & Glock) xv
Nitrogen of the potato (Neuberger & Sanger) 662
*Nitrogen of the potato (Neuberger & Sanger) iv (Nos. 1 & 2)
Nitrogen retention and the diabetogenic action of anterior pituitary extract (Young) ii (Nos. 1 & 2)
Nucleotides, adenosine- and inosine-, in phosphorus metabolism of muscle (Kleinzeller) xiv

Oestrogens, structure and local activity of (Emmens) iv (Nos. 1 & 2)

Oil seeds, phosphatides from (Rewald) 822
Ornithine cycle of urea formation, the (Krebs) viii
Oxaloacetic acid, ketone decomposition of, effect of inorganic salts on (Krebs) 303
Oxidants and reductants, the effect of, on sugar hydrolysing enzymes (Feigenbaum) 768
Oxidase, *d*-amino-acid conjugated protein, effect of X-rays on (Dale) 80
Oxidation of amines by bacteria (Gale) 64
Oxidation of ascorbic acid in the presence of copper, the (Mystkowski) 494
Oxidation, catalytic, of ascorbic acid in the presence of tea infusions (Snow & Zilva) 641
Oxidation, enzymic, of sulphur-containing amino-acids (Medes & Floyd) 259
Oxidation of pyruvate by the tissues of symptom-free rats on diets deficient in vitamin B_1 (Banerji & Yudkin) 530

Palm oil carotenoids, isolation of, from West African plantation oil (Hunter, Scott & Edisbury) 697
Pantothenic acid, analogues of (Barnett & Robinson) 357, 364
Pantothenic acid, bacterial inhibition of metabolite analogues of (McIlwain) 417
Parathyroid hormone, effect on blood and bone chemistry of prolonged administration of, to puppies on varying calcium intakes (Burns & Henderson) iii (Nos. 3 & 4)
Partition chromatogram of Martin & Synge (Smith) xxii
Partition chromatography in protein chemistry; amino-acid composition of gramicidin (Gordon, Martin & Synge) xxi
Penicillin, purification of (Cook) xxiii
Penicillium resticulosum sp.nov., fumaryl-*dl*-alanine (fumaromono-*dl*-alanide), a metabolic product of (Birkinshaw, Raistrick & Smith) 829
Penicillium stipitatum Thom, stipitatic acid, $C_8H_6O_5$, a metabolic product of (Birkinshaw, Chambers & Raistrick) 242
*p*H, effect of, on production by *Cl. welchii* during growth of α and θ toxins and hyaluronidase (Gale & van Heyningen) 624
*p*H, influence of, upon the equilibrium state in phosphorylase systems (Hanes & Maskell) 76
*p*H of medium during growth, effect of, on enzymic activities of bacteria (*Escherichia coli* and *Micrococcus lysodeikticus*), biological significance of changes produced (Gale & Epps) 600
Phosphate transfer in muscle extract, effect of amino-acids on (Lehmann & Pollak) 672
Phosphatides of *Hevea Brasiliensis* (Tristram) 400
Phosphatides from oil seeds (Rewald) 822
Phosphatides, vegetable seed, the component fatty acids of (Hilditch & Zaky) 815
Phosphoglyceric acid, dissimilation of, by *Escherichia coli* (Utter & Werkman) 485
Phosphorus metabolism of muscle, adenosine- and inosine-nucleotides in (Kleinzeller) xiv
Phosphorus metabolism of muscle, adenosine- and inosine-nucleotides in (Kleinzeller) 729
Phosphorylase systems, influence of *p*H upon the equilibrium state in (Hanes & Maskell) 76
Phosphorylysis of glycogen and muscle action (Mirski & Wertheimer) 221
Pig, glycogen of *Ascaris lumbricoides* from the (Baldwin & King) 37
Pig livers, vitamin A contents of (Moore & Payne) 34
Pig, the supplementary values of yeast protein and casein for maize protein in the nutrition of the (Macrae, El-Sadr & Sellers) 460
Pigeon brain, method for the estimation of α-keto-acids, and its application to α-keto-acid metabolism in (Long) 807
Pigments, estimation of, by the spectrocomparator (Ellinger) 283
Pigments, fluorescent, in urine, routine chromatography of (Coulson, Ellinger, Glock & Platt) xix
Plant tissues, control tests with (Harris & Olliver) 155
Plasma proteins, estimation of, by the salicylsulphonic acid reaction (Mawson) 273
Polarographic studies on the excretion of organic antimonials (Goodwin & Page) xi
Polysaccharide from *Bact. typhosum* Ty_2 (Freeman) 340
Polysaccharide storage in *E. coli*, some aspects of (Dawson & Happold) v
Potassium, effects of, on bacterial oxidation of vitamin B_1 (Quastel & Webley) 8
Potassium as an essential factor in fermentation of maize meal by *Cl. acetobutylicum* (BY) (Davies) 582
Potato, nitrogen of the (Neuberger & Sanger) 662
*Potato, nitrogen of the (Neuberger & Sanger) iv (Nos. 1 & 2)
Potentiometric method for determining ascorbic acid (Harris, Mapson & Wang) 183
Pregnancy, normal and toxaemic, further investigations on histidine and histamine metabolism in (Kapeller-Adler & Adler) ii (Nos. 3 & 4)
Proliferation-promoting effect of damaged-cell products attributable to adenine nucleotides and known growth factors (Loofbourow) 737
Proliferation-promoting factors, production and release of, by injured cells (Loofbourow) 631
Proliferation-promoting intercellular hormones. 3. Relation of aeration to the activity of proliferation-promoting factors from injured cells (Loofbourow, Webb, Loofbourow & Abramowitz) 513
Protein, *d*-amino-acid oxidase, effect of X-rays on (Dale) 80
Protein chemistry, partition chromatography in: amino-acid composition of gramicidin (Gordon, Martin & Synge) xxi
*Proteins, anaphylactic sensitization of guinea-pigs to (Winter) v
Protein estimation, by the biuret and Greenberg methods (Wokes & Still) 797
Protein intake, effect of, on absorption of calcium and magnesium (McCance, Widdowson & Lehmann) 686
Proteins, plasma, estimation of, by the salicylsulphonic acid reaction (Mawson) 273
Pyruvate, oxidation of, by tissues of symptom-free rats on diets deficient in vitamin B_1 (Banerji & Yudkin) 530
Pyruvic acid, some chemical reactions of (Cook & Findlay) ii (Nos. 3 & 4)

Rachitogenic diets, high calcium-low phosphorus, a study of the antirachitic effect of fat on rats receiving (Booth, Henry & Kon) 445
Rat, the albino, specific effect of Vitamin A on body weight and composition of (Patterson, McHenry & Crandall) 792
Rat livers, effect of variations of diet fat on (Channon, Hanson & Loizides) 214
Reductants and oxidants, the effect of, on sugar hydrolysing enzymes (Feigenbaum) 768
Rennet, production of, from living calves (Berridge, Davis, Kon, Kon & Spratling) iii (Nos. 1 & 2)
Resazurate, sodium, for testing the hygienic quality of milk, synthesis and standardization of (Baker, Davis, Leeds, Oxley, Short, Twigg & Watson) i (Nos. 1 & 2)
Rose hips, vitamin C in (Pyke & Melville) 336
Ruminant, digestion of straw by the (McAnally) 392

Salicylate and cinchophen, effect of, on enzymes and metabolic processes (Lutwak-Mann) 706
Salicylsulphonic acid reaction, estimation of plasma proteins by the (Mawson) 273
Salts, inorganic, effect of, on the ketone decomposition of oxaloacetic acid (Krebs) 303
Schizophyllum commune Fr., production of methyl mercaptan by (Birkinshaw, Findlay & Webb) 526

Sheep livers, vitamin A contents of (Moore & Payne) 34
Spectra, absorption, comparison of, by the spectrocomparator (Ellinger) 283
Spectrocomparator (Ellinger) 283
Steam distillation apparatus for micro-Kjeldahl analysis (Markham) 790
Steroids, metabolism of (Haslewood) 389
Steroids, urinary, application of chromatography to the separation of (Callow) xix
Stipitatic acid, $C_8H_6O_5$, a metabolic product of *Penicillium stipitatum* Thom (Birkinshaw, Chambers & Raistrick) 242
Straw, digestion of, by the ruminant (McAnally) 392
*Subcutaneously implanted hormone tablets, formation of 'ghosts' in (Folley) xiv
Sugar hydrolysing enzymes, the effect of oxidants and reductants on (Feigenbaum) 768
Sulphanilamide, the *p*-aminobenzoate of plasma in relation to the action of (McIlwain) vi
Sulphanilamide and related substances, surface behaviour of (Bradbury & Jordan) 287
Sulphites, action of, on cystine disulphide linkages of wool (Middlebrook & Phillips) 428
Sulphonamide drugs, a note on the estimation of, by the method of Werner (Mawson) 845
Sulphur, metabolism of (Medes & Floyd) 259
Sulphur, metabolism of, cysteic acid (Medes & Floyd) 836
Supplementary values of yeast protein and casein for maize protein in the nutrition of the pig (Macrae, El-Sadr & Sellers) 460
Surface behaviour of antibacterial substances (Bradbury & Jordan) 287

*Tablets, hormone, subcutaneously implanted, formation of 'ghosts' in (Folley) xiv
Takadiastase, precaution in the use of, for the estimation of maltose (Bunting) 639
Tea infusions, catalytic oxidation of ascorbic acid in the presence of (Snow & Zilva) 641
Tetanus toxoid, purification of (Moloney & Hennessy) 544
Thyroid gland material, the estimation of iodine in; an examination of Kendall's method of combustion (Doery) 519
Tissue, adipose, *in vitro*, metabolism of (Mirski) 232
Tissue slice method in manometric experiments (Laser) 319
Tissues, animal, quantitative estimation of 3:4-benzpyrene in (Berenblum & Schoental) 86
Tissues, plant, control tests with (Harris & Olliver) 155
Tissues *in vitro*, effect of certain substances on the growth of (Davidson & Waymouth) i (Nos. 3 & 4)
Toxins, *Cl. oedematiens*, lecithinase activity of (Macfarlane) iii (Nos. 1 & 2)
Toxin, *Cl. welchii*, specificity of lecithinase present in (Macfarlane) iii (Nos. 1 & 2)
α and θ toxins, production of, during growth of *Cl. welchii*, effect of *p*H and glucose (Gale & van Heyningen) 624
Toxoid, tetanus, purification of (Moloney & Hennessy) 544
Tryptophanase-tryptophan reaction (Evans, Handley & Happold) 311

Ultrafilterable serum magnesium in hyperthyroidism, the (Cope & Wolff) 413
Urea, determination of, by microdiffusion methods using buffered absorbents (Conway & O'Malley) 655
Urea formation in mammalian liver (Krebs) 758
Urea formation, the ornithine cycle of (Krebs) viii
Urea, synthesis of, in mammalian liver, without participation of arginase (Bach & Williamson) xvi
Uricase, purification of (Davidson) 252
Urinary steroids, application of chromatography to the separation of (Callow) xix
Urine, detection of insulin in (Cutting) 376
Urine, human, elimination of fluorescent pigments in; comparative effect of nicotinamide and related compounds on (Coulson, Ellinger & Platt) xii
Urine, routine chromatography of fluorescent pigments in (Coulson, Ellinger, Glock & Platt) xix

Vegetables and fruits, determination of ascorbic acid in, in presence of SO_2 (Mapson) 196
Vegetable seed phosphatides, the component fatty acids of (Hilditch & Zaky) 815
Viscous materials, formation of, by *Clostridium butylicum* (Lythgoe & Madinaveitia) ix
Vitamin A contents of livers of sheep, cattle and pigs (Moore & Payne) 34
Vitamin A, physiological properties of. 1. Specific effect upon body weight and composition in the albino rat (Patterson, McHenry & Crandall) 792
Vitamin A and B_1 determinations, increase in weight of rats during the dosing period of, and relation to the standard deviation of that increase (Coward) 795
Vitamin B_1 and bacterial oxidation (Quastel & Webley) 8
Vitamin B_1 sparing action of fat and protein, the. 3. The oxidation of pyruvate by the tissues of symptom-free rats on diets deficient in vitamin B_1 (Banerji & Yudkin) 530
Vitamin C, estimation of, by titration against 2:6-dichlorophenolindophenol (Harris & Olliver) 155
Vitamin C in rose hips (Pyke & Melville) 336
Vitamin D content of English butter fat throughout the year, the (Henry & Kon) 456
Vitamin methods (Harris & Olliver) 155; (Harris, Mapson & Wang) 183; (Mapson) 196
Vitamin P, a biological test for activity of (Bacharach, Coates & Middleton) 407
Vitamin P, observations on correlation between positive and negative methods of determining the capillary resistance in man (Bell, Lazarus, Munro & Scarborough) iii (Nos. 3 & 4)
Vitamins, principles of fluorimetric estimation of (Wokes, Organ & Jacoby) vii

Weight and body composition in the albino rat, specific effect of vitamin A on (Patterson, McHenry & Crandall) 792
Weight of rats, increase of, during the dosing period of vitamin A and B_1 determinations, and relation to the standard deviation of that increase (Coward) 795
Werner, a note on the method of, in the estimation of sulphonamide drugs (Mawson) 845
Wheat straw and wheat-straw pulp, the digestibility of (Ferguson) 786
Wood-rotting fungi, biochemistry of. 3. The production of methyl mercaptan by *Schizophyllum commune* Fr. (Birkinshaw, Findlay & Webb) 526
Wool, action of sulphites on cystine disulphide linkages of (Middlebrook & Phillips) 428
Wool, cystine disulphide linkages in, action of formaldehyde on (Middlebrook & Phillips) 294

X-ray diffraction studies in iodinated amino-acids and proteins (Spiegel-Adolf, Hamilton & Henny) 825
X-rays, effect of, on the conjugated protein *d*-amino-acid oxidase (Dale) 80

Yeast, brewery, *Acetobacter* species as common contaminants of (Walker & Tošić) vii
Yeast, direct fermentation of maltose by (Leibowitz & Hestrin) 772
Yeast protein and casein, supplementary values of, for maize protein in the nutrition of the pig (Macrae, El-Sadr & Sellers) 460

Zinc, absorption and excretion of (McCance & Widdowson) 692

CAMBRIDGE: PRINTED BY WALTER LEWIS, M.A., AT THE UNIVERSITY PRESS

PRICES OF BACK NUMBERS AND VOLUMES

In paper covers

Volumes I–VI.	31*s.* 6*d.* net per vol.	Quotations can be given by the publishers for bound copies of back numbers.
Volumes VII–X.	(*Out of print.*)	
Index of Authors and Subjects in Volumes I–X.	5*s.* 3*d.* net. (By post, 5*s.* 5*d.*)	
Volumes XI–XVI.	(*Out of print.*)	
Volumes XVII–XVIII.	60*s.* net per vol.	
Volume XIX.	(*Out of print.*)	
Volumes XX–XXV.	60*s.* net per vol.	
Volumes XXVI–XXXIV.	70*s.* net per vol.	
Index of Authors and Subjects in Volumes XI–XX.	10*s.* net. (By post, 10*s.* 4*d.*)	

Claims for Journals lost in Post will not be entertained more than 3 months after the date of posting of the Journal.

For Notice to Contributors see page 2 of Wrapper
